

# Fly the Airplane First, G.A.Topic of the Month, and Learning to Deal With Emergencies

NTSB accident data suggest that pilots, while distracted by less essential tasking, have lost control of their aircraft and crashed. In light of this pilots are reminded to maintain aircraft control at all times. This may mean delay in responding to ATC communications and passenger requests or not responding at all unless positive aircraft can be maintained throughout. In other words, Fly the Aircraft First!

**Directions:** Grand Canyon Room North Las Vegas Air Terminal

## A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
